

Gemini™ Dual Wall Tank Systems

Cylindrical and Square Model Tank Systems

Features and benefits of Gemini Tank Systems

- Specifically Designed for the Water Treatment Industry
- Linear polyethylene construction. Polypropylene, XLPE and PVDF available - Superior chemical resistance for acids, caustics, sodium hypochlorite, biocides, etc. Handles aggressive applications that stainless steel will not.
- Durable dual wall construction - Standard tanks rated 1.5 SPG, 1.9 SPG heavy duty available. "Tank in a Tank" design for instance where primary tank fails, the chemical will be safely contained in the secondary tank.
- Integral pump mounting platform - Lid has 240 pound rating allowing for use with metering pump or mixer mounted directly to tank dome. Models with sump reservoir collects and drains liquid back to primary.
- Pump pick-up tube port - Install pump suction line with check valve quickly and easily. Once installed, tank contents are sealed from outside environment.
- Integral mouse door - Molded directly into most Gemini models, recessed mouse doors allow for inexpensive installation of optional bottom bulkhead fitting for flooded suction connection or bottom fill.
- Custom colors and mold-in graphics - Custom colors available, subject to minimum order quantity. Private label mold-in graphics are molded directly into tank and won't weather, crack, peel, or deteriorate.
