

Industrial Cellular Router

Item # GWBR1-0 (opaque door)

Item # GWBR1-C (clear door)

(4 Port Switch Upgrade (add -SW4 to part number))

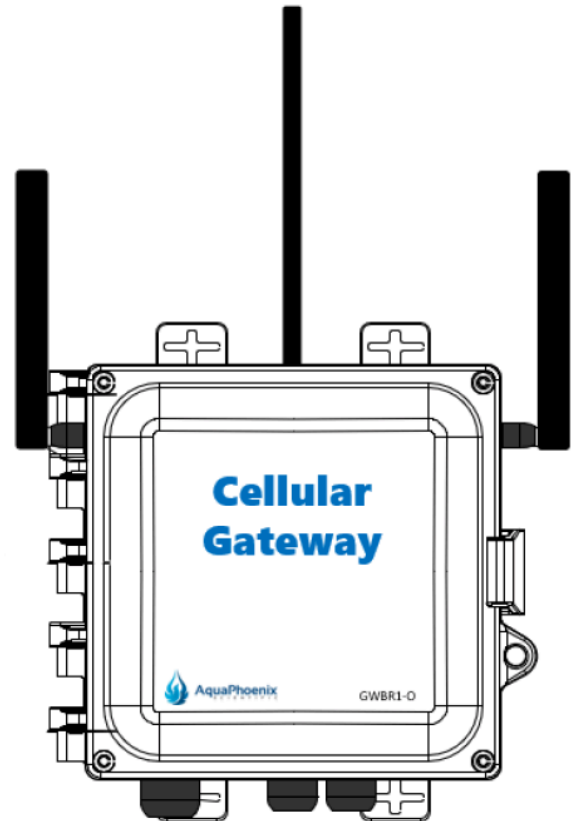

The GWBR1 is a fully featured, industrial cellular gateway designed for water treatment professionals. This M2M solutions provides reliable remote access to your internet enabled feed and control equipment. Receive alarms*, emails*, and upload data** from anywhere internet service is available. The integrated Wi-Fi not only provides local wireless access to the control and feed equipment, it is an Internet hot spot. The hot spot is perfect for accessing your online service reporting tools, email, and documentation while still on-site.

* Alarm and email functionality are a function of the feed and control system and are not generated by the router. It is very important that there is **local monitoring** of system alarm conditions.

** Data uploads are a function of the control system. Frequent data uploads may result in increased data use.
